

## Partial Contents of *Software State-of-the-Art*

### Part I: Management

Overstructured Management of Software Engineering  
**Gerald M. Weinberg**

No Silver Bullet: Essence and Accidents of Software Engineering  
**Frederick P. Brooks, Jr.**

Understanding and Controlling Software Costs  
**Barry W. Boehm and Philip N. Papaccio**

Characterizing the Software Process: A Maturity Framework  
**Watts S. Humphrey**

The Computer Software Industry in Japan  
**Denji Tajima and Tomoo Matsubara**

The Information Archipelago—Maps and Bridges  
**James L. McKenney and F. Warren McFarlan**

The Dynamics of Software Project Staffing: A System Dynamics Based Simulation Approach  
**Tarek K. Abdel-Hamid**

Reflections on Software Research  
**Dennis M. Ritchie**

### Part II: Measurement

A Meta-Model for Software Development Resource Expenditures  
**John W. Bailey and Victor R. Basili**

Function Point Analysis: Difficulties and Improvements  
**Charles R. Symons**

A Model for Estimating Program Size and Its Evaluation  
**Minoru Itakura and Akio Takayanagi**

Demographic and Technical Trends in the Computing Industry  
**T. Capers Jones**

### Part III: Methods

A Software Development Environment for Improving Productivity  
**Barry W. Boehm, Maria H. Penedo, E. Don Stuckle, Robert D. Williams, and Arthur B. Pyster**

Box Structured Information Systems  
**H.D. Mills, R.C. Linger, and A.R. Hevner**

Cleanroom Software Development: An Empirical Evaluation  
**Richard W. Selby, Victor R. Basili, and F. Terry Baker**

Practical Priorities in System Testing  
**Nathan H. Petschenik**

Software-ICs: A Plan for Building Reusable Software Components  
**Lamar Ledbetter and Brad Cox**

Frame-Based Software Engineering  
**Paul G. Bassett**

Software Engineering with Reusable Designs and Code  
**Robert G. Lanergan and Charles A. Grasso**

STATEMATE: A Working Environment for the Development of Complex Reactive Systems  
**D. Harel, H. Lachover, A. Naamad, A. Pnueli, M. Politi, R. Sherman, and A. Shtul-Traubing**

Modula-2—A Solution to Pascal's Problems  
**Roger T. Sumner and R.E. Gleaves**

A Rational Design Process: How and Why to Fake it  
**David Lorge Parnas and Paul C. Clements**

### Part IV: News From Left Field

Self-Assessment Procedure IX  
**Eric A. Weiss, editor, and Donn B. Parker**

IBM's Santa Teresa Laboratory—Architectural Design for Program Development  
**Gerald M. McCue**

Composing Letters with a Simulated Listening Typewriter  
**John D. Gould, John Conti, and Todd Hovanyecz**

Ray Tracing Jell-O Brand Gelatin  
**Paul S. Heckbert**

Fifteen Years of Psychology in Software Engineering: Individual Differences and Cognitive Science  
**Bill Curtis**

Breakdowns and Processes During the Early Activities of Software Design by Professionals  
**Ramonde Guindon, Herb Krasner, and Bill Curtis**

The Real Ada, Countess of Lovelace  
**Carol L. James and Duncan E. Morrill**

The Errors of T<sub>E</sub>X  
**Donald E. Knuth**

WINNER OF  
COMPUTER BOOK REVIEW'S  
MAEVENTEC AWARD FOR  
"books which are exemplary in  
style, content, and format."

# Software State-of-the-Art

## Selected Papers

edited by Tom DeMarco and  
Timothy Lister

ISBN: 0-932633-14-5  
©1990 584 pages hardcover  
\$51.95 (incl. \$6.00 for UPS in US)

*A Decade's Worth of Classic Papers—  
Collected into a Single Volume*

In one convenient collection, *People-ware* authors Tom DeMarco and Timothy Lister present a decade's worth of papers that changed the history of software development. Published in 1990, this collection represents some of the best writing from some of the biggest names in the industry: Frederick P. Brooks, Gerald M. Weinberg, Watts S. Humphrey, T. Capers Jones, Barry W. Boehm, Bill Curtis, Donald E. Knuth, Victor R. Basili, Brad Cox, Harlan Mills, and many more.

The papers were selected from more than a dozen sources, including *IEEE Computer*, *Software—Practice & Experience*, *IEEE Transactions on Software Engineering*, and *Communications of the ACM*.

"This is what it must be like to dine with a celebrated gourmet and have your meal ordered for you. . . . there is something here for everyone. Kudos to DeMarco and Lister for orchestrating a valuable and relevant collection."

—Robert Wray, *CASE Trends*

". . . a must read since it contains many of the original works that defined the growth of software engineering in the last decade."

—Warren Keuffel  
*Computer Language*

"Everyone will have his or her own favorite in this list (mine is Brooks's 'No Silver Bullet' paper). . . . there will be quite a few that you have been meaning to read but have been unable to find. Now you have no excuse . . . buy this book."

—Ed Yourdon  
*American Programmer*
